Motor	Koop 192F
Radio de trabajo	2890 mm

Descripción

The GG1050C adds a heated cabin to the GG1050 platform, combining movable arm and expandable tracks with weather protection — all in a 1000 kg package powered by a Koop 192F engine (7.2 kW). Great value for operators who want cabin comfort and versatile digging features at an entry-level price. Suited for small contractors and property managers who work through colder months and need an affordable, fully enclosed mini excavator.
