

GG06LX

Backhoe loader 25hp (max 600 kg)

Ref.: G301-24102

Descripción

The GG06LX is a versatile two-in-one machine combining a front loader (0.3 m³) with a rear excavator (0.045 m³) on a single 2280 kg platform. Powered by a Kubota 25 HP engine with Parker/PWG hydraulics. Load from the front, dig from the back — no need for two separate machines. Ideal for small contractors, utility companies, and farms who need both loading and excavation capability without investing in multiple machines.
