Descripción

The GG015 delivers 1500 kg capacity with a Yunnei 50 HP engine and a generous 0.7 m³ bucket. At 3750 kg with 3000 mm lifting height, 4x4 drive, and 16 km/h speed, it moves more material per cycle than smaller models. The larger bucket volume significantly improves productivity on bulk material handling. Built for professional operations — quarries, large farms, construction depots — where moving high volumes of material efficiently is the priority.
