Descripción

The GG635 is a heavy-duty telehandler with 3500 kg capacity, powered by a turbocharged Changchai 95 HP engine. At 7300 kg with hydrostatic drive, XCMG axles, 280 bar hydraulic pressure, and wet brake system, it handles the most demanding lifting operations. Load-sensing piston pump and 175 L hydraulic flow ensure precise control with heavy loads. Built for large construction sites, industrial facilities, and major agricultural operations requiring serious lifting capability.
